Work experience

Movie recommendation system| React, JavaScript, Html, Css

- Movie recommendation system is a software designed to recommend movie Based on user input and search.
- It also gives overview of movie with imdb ratings and cast.
- So user has to just enter movie name and then all the top movies related to search will be displayed on the screen and then we can see their overview, ratings and cast
- So it will help user to select perfect movie to watch.

Sales Prediction |

- Sales Prediction is ML Based project to predict the sales of Certain Organization, mall, supermarket from the result of past events.
- Accurate sales Prediction can aid in financial planning and budget.
- It also provides insight to customer behaviour and current market trends.
